About Training Sessions

Through both written tests and hands on demonstrations, these sessions will provide training and evaluation for small system operators in order to increase their knowledge, skills and abilities. This enhancement of knowledge, skills and abilities will assist operators in preventing, mitigating and repairing damage to a gas distribution system.

Sessions will be centrally located to our members and will be held in both Auburn, IL and Pinckneyville, IL. The same tasks will be covered at both locations. The one day sessions will begin at 8:30 am and conclude at 5 pm. The registration fee will include professional qualification and evaluation over the covered tasks, classroom facilities, materials and lunch. A certificate will be issued upon completion of each session.

About IMGA

The IMGA was formed in 1990 for the purpose of providing natural gas services to its members in the most efficient and economical way possible. We are a unit of local government just like our members. For that reason, we are prohibited by law from making a profit and thus are able to provide valuable services at a lower cost than our competitors.

At the request of our members, IMGA organized an Operator Qualification Training Program with the assistance of APGA's Security and Integrity Foundation and with the support of the Illinois Commerce Commission. Our members have spoken and we are committed to providing services that fulfill the needs of our members.

For more information please visit our website at www.imga.org or contact us at 217-GET-IMGA.
